

**paperc.com**

PaperC, the online platform for academic eBooks, has an immediate opening for a

...searching for a pioneer ...

## **Python/Django Developer (m/w, full-time) for our Office in Düsseldorf**

As a Python developer, you will be an important part of our team responsible for PaperC's online services.

If you're someone interested in new technology and Web-based services, and are searching for an exciting, dynamic work environment with plenty of room for self-development, then you've come to the right place.

Requirements:

- Fundamental experience with Python and the Django Framework
- Experience with agile software development (SCRUM)
- Full university- or apprentice-level training in computer science or equivalent relevant qualification (though your passion and dedication matter most)
- At least two years' relevant work experience

Specific skills:

- Knowledge of HTML, CSS and JavaScript
- REST APIs preferred

Be a part of our motivated, globally focused team. We would be happy for the chance to bring you on board and look forward to receiving your application with necessary certificates and other documentation.

Please send it all plus CV to
